ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: EMBEDDED KEYING

(57) Abstract: Method of communicating digital data in which frames (8) are transmitted cyclically whereby a first number of sym-
bols is transmitted according to a first keying mode (H) using a first constellation, and a second number of symbols is transmitted
according to a second keying mode (L) using a second constellation. The first and second keying modes (H, L) are used at predeter-
mined positions in the frame, whereby both the symbols according to the first and second keying mode carry information under at
least an operative traffic phase.
